## INTRODUCTION

This table of 1970 Census population and housing totals is being published in an effort to make these data more readily available to those users without the greater resources that a computer system provides. These population and housing counts were compiled from the 1970 Census first count computer tapes released by the United States Bureau of the Census in March, 1971 and subsequently revised.

Among the items listed on these tapes, which are not subject to suppression, is a count of total population and housing units for each of the 7,701 block groups and 311 enumeration districts used to gather and report the 1970 Census of Los Angeles County. The Commission's Data System Section grouped the returns from these 8,012 small areas into the 1,576 census tracts into which the County is divided so as to simplify the manipulation and use of these data.

## CORRECTIONS

The United States Bureau of the Census has acknowledged that misallocations or errors were discovered in the total population and housing unit counts of certain census tracts after the initial release of the 1970 Census First Count Summary Tapes.

Revised population and housing totals have been received through September 18, 1972 for the following census tracts:
